👤 PROFILE SUMMARY

Hi, I'm Bilal, — a Frontend Developer focused on creating clean, responsive, and user-friendly web applications.

I specialize in modern frontend technologies including React, Next.js, TypeScript, and Tailwind CSS. I believe in writing clean, maintainable code and creating pixel-perfect user interfaces.

I started my web development journey in 2024 with zero knowledge but a huge passion for coding. Through consistent practice and learning, I grew from basic HTML & CSS to JavaScript, then React, Tailwind CSS, Next.js & TypeScript, and now exploring Node.js, Express.js, MongoDB.

I believe in building real projects and continuously improving my skills through challenges and experimentation.

My goal is to evolve into a Full-Stack Developer, mastering both frontend and backend technologies to build complete, scalable solutions.
