Summary

Full-Stack Developer skilled in HTML, CSS, JavaScript, React, Tailwind CSS, Node.js, and Express.js. Experienced in building responsive web applications and dynamic user interfaces. Passionate about learning new technologies and contributing to innovative projects.

Experience / Projects

Smart Power Solution

A responsive website for Smart Power Solution built using HTML, CSS, JavaScript, and Tailwind CSS with smooth animations.

Villa Landing Page

A modern and fully responsive Villa Booking website built with React, Tailwind CSS, and JavaScript — allowing users to explore, view details, and seamlessly book luxury villas.

React user management-crud

A fully functional React User Management CRUD Application built using React.js and Axios with live API integration from MockAPI.io. Users can create, read, update, and delete records dynamically. The app uses Material UI (MUI) for a clean and responsive interface and React Router for page navigation.

learning-projects

A collection of hands-on projects built using HTML, CSS, and JavaScript to strengthen my web development skills.
